Education

VIPS-TC <i>BTech in Industrial Internet of Things</i>	2024 – 2028
S.R.DAV Public School <i>Secondary and Higher Secondary</i>	2022 – 2024

Skills

Game Engines Godot 4 (2D & 3D), Unity	Tools Git, GitHub Desktop, Kenney Assets
Languages GDScript, C#, Python, C	Other Linux Systems, Effective Prompt Engineering
Concepts Finite State Machines, AI Pathfinding, Shader Programming, Physics Systems	

Experience

Game Development Intern – Vapronix Web	January 2026
– Developed a grid-based Arrow Puzzle game in Unity with custom level data structures and collision detection for dynamic grid sizes (3x3 to 6x6); engineered time-based win/fail conditions and automated level loading for a mobile-friendly game loop.	
Technical Lead – Game Veda (Game Dev Club, VIPS)	2024 – Present
– Mentor junior developers, organize internal jam sessions, and serve as technical reviewer for the college game development club.	

Projects

SCP-2949 Horror Project – Solo Developer, Godot 4	March 2026 - Ongoing
– Architected a complete 3D horror game in Godot 4 with movement physics and custom GLSL shaders (“TV static” aesthetic).	
Cravix – AI Recipe App	May 2026
<i>Next.js 15, TypeScript, Gemini 2.0 Flash, TailwindCSS, shadcn/ui</i>	
– Built an AI-powered recipe transformation app with dynamic goal generation, interactive taste/health/convenience sliders, and a bespoke dark-mode UI; deployed live on Vercel.	
Asm-runner – Bash, GCC, x64 Assembly	April 2026
– CLI tool to compile and run x64 assembly programs via GCC with GDB debug mode, argument parsing, and robust input validation.	

Game Jams & Competitions

Cravix – AMD Slingshot Ideathon – 3rd Place	May 2026
– Won 3rd place for Cravix; evaluated on product vision, UI polish, and real-world AI integration at an AMD-sponsored ideathon.	
Power Sword – Kenney Jam 2025	July 2025
– Shipped a top-down arcade game in Godot 4 with AI patrol, line-of-sight, and dynamic chase systems; met the “Power” theme constraint using Kenney’s open-source asset library.	
Vibe Clash – GGSIPU East Campus Web Contest	2025
– Built NyaySetu , a legal-tech platform (React, TailwindCSS, Framer Motion) with an AI chatbot, document analysis, and lawyer directory; recognised for UI design and functionality.	

Position of Responsibility

Brands and Communication Member – Entrepreneurship Cell	2025
– Produced and edited viral and professional reels, significantly boosting the club’s online reach and engagement.
